PROFESSIONAL SUMMARY

Motivated Full Stack Web Developer and B.Tech Computer Science student (graduating 2027) with hands-on experience building MERN stack applications and applying large language models (LLMs) in practical projects. Proficient in React.js, Node.js, Express.js, MongoDB, and MySQL, with growing expertise in LLM-based application development including prompt engineering, structured output validation, and agentic reasoning patterns. Strong foundation in Data Structures and Algorithms using C++. Passionate about writing clean, scalable code and delivering impactful software solutions.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js
Backend: Node.js, Express.js, REST APIs
Databases: MongoDB, MySQL
Languages & DSA: C++ (Data Structures & Algorithms)
Tools & Platforms: Git, GitHub, Visual Studio Code, npm

AI & LLM DEVELOPMENT

- LLM Inference & APIs: Hands-on experience using Groq for fast, low-latency LLM inference in applications.
- Structured Outputs: Used Pydantic to define and validate JSON schemas for reliable, structured LLM responses.
- Prompt Design: Practical understanding of system roles, prompt engineering techniques, and temperature tuning to control LLM output style, creativity, and determinism.
- Agentic Reasoning: Familiar with the ReAct (Reasoning + Acting) framework for building LLMs that reason through problems and take actions step by step.
- Applied understanding of how LLMs generate answers, including the role of context, prompting strategy, and sampling parameters in shaping responses.

PROJECTS

ResQMeal - Food Rescue & Delivery Platform (MERN Stack) -	2024
<i>github.com/Aryans4/Project_ResQMeal</i>	
• Built a full-stack web application using MongoDB, Express.js, React.js, and Node.js to connect food donors with NGOs and individuals in need. • Designed and implemented RESTful APIs for user authentication, food listing, and real-time request management. • Created a responsive React.js frontend with dynamic routing and state management for seamless user experience. • Integrated MongoDB for efficient storage and retrieval of donor and recipient data. • Tech Stack: React.js, Node.js, Express.js, MongoDB, REST API, Git	

EDUCATION

Bachelor of Technology (B.Tech) - Computer Science & Information Technology	Expected: 2027
<i>KCC Institute of Technology and Management, Delhi NCR</i>	
• Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Operating Systems, Object-Oriented Programming, Computer Networks	

ADDITIONAL INFORMATION

- Actively solving DSA problems in C++ to strengthen problem-solving and algorithmic thinking skills.
- Familiar with the complete MERN stack development lifecycle — from UI design to backend API development and database integration.
- Exploring the intersection of full-stack development and applied AI, including building LLM-powered features into web applications.
- Languages: English (Professional), Hindi (Native)
