PROFESSIONAL SUMMARY

Results-driven Software Engineer with 2+ years of experience designing and building scalable backend microservices and AI-enabled applications. Strong foundation in data structures, algorithms, AWS cloud architectures, and distributed systems. Experienced in collaborating across agile teams to deliver high-quality software.

WORK EXPERIENCE

NovaTech Solutions — Software Development Engineer I (June 2024 – Present | San Francisco, CA)

- Designed and implemented RESTful microservices in Python and Java, serving over 2M+ daily requests with 99.95% uptime.
- Integrated GenAI developer tools and document intelligence pipelines using AWS Bedrock and LangChain.
- Optimized SQL queries and PostgreSQL indexes, reducing average API response latency by 35%.
- Automated CI/CD deployment pipelines using GitHub Actions and Docker/ECS, reducing deployment cycle times by 40%.
- Participated in code reviews, technical documentation, and on-call operational troubleshooting for production services.

Apex Cloud Systems — Software Engineering Intern (May 2023 – August 2023 | Seattle, WA)

- Developed real-time telemetry monitoring dashboards using Python, TypeScript, and AWS CloudWatch.
- Implemented distributed caching with Redis, reducing peak database load by 25%.
- Authored unit and integration test suites using pytest and JUnit, increasing test coverage from 68% to 88%.

EDUCATION

University of California, Berkeley — Bachelor of Science in Computer Science (GPA: 3.85 / 4.0 | Graduated: May 2024)

Relevant Coursework: Data Structures & Algorithms, Distributed Systems, Operating Systems, Database Systems, Artificial Intelligence.

TECHNICAL SKILLS

- Languages:** Python, Java, C++, TypeScript, Go, SQL, Bash
- Frameworks & Tools:** FastAPI, Spring Boot, Docker, Kubernetes, Git, GitHub Actions, PyTorch
- Cloud & Databases:** AWS (EC2, S3, Lambda, ECS, RDS), PostgreSQL, MongoDB, Redis
- Core Concepts:** Object-Oriented Design, Microservices, CI/CD, GenAI Tools, Distributed Systems, System Design

KEY PROJECTS

Distributed Task Queue Engine (Python, Redis, Docker): Built an asynchronous worker engine with fault-tolerance and retry mechanisms handling 50k+ jobs/hour.

AI Knowledge Search Assistant (Python, LangChain, FAISS): Implemented a RAG pipeline for documentation querying with sub-second semantic search.

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate (2024) | AWS Certified Developer – Associate (2023)
